

# Aegina Company Information

## About Aegina

The management team have developed a business model specialising in the aerospace, gas & oil and underwater manufacturing sectors now employing some 40 staff.

We have invested in new management systems PSL Datatrack and CNC programming software Visicam & EzCam in order to support the continued investment in CNC machine tools and associated equipment.

The company has now structured both its IT and CNC machining capacity to increase sales to £3.2 million per annum and will continue to invest in advanced CNC machining technology coupled with a staff training programme in order to sustain and improve its position within the market place.

## Services

Aegina Technology offer the following services:-

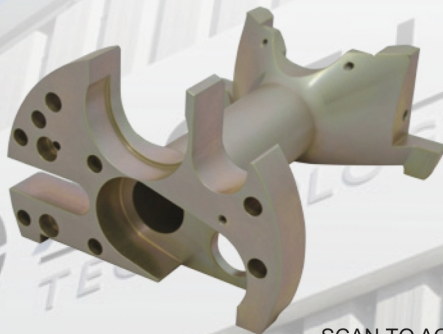

- CAD Cam
- CNC Milling
- CNC Turning
- Assembly
- Sub Con Services

## Quality

Aegina Technologies operates a QMS which complies to the requirements of AS9100 REV C / BS EN 9100:2009, ISO 9001:2008 and assessed and certified in accordance with EN 9104:P1.

We are certified to manufacture precision engineered components to the aerospace, oil, gas and underwater industries utilising solid modelling and surface machining to support both design and programming requirements.
